NSC with the help of National Fishery Development board has started Fish Seed Production at CSF,Suratgarh. We will be producing around 1 Crore of Fingerlings in current year , which will be increased year after year. These quality Fingerlings will be provided to Farmers at reasonable price, so that they can start the table fish production in their farms .This will help the farmers in doubling their income , which is the vision of Hon'ble Prime Minister of India . This will also address the solution to tackle the shortage of quality fish seed presently in India.
